Abalta Technologies Supports the Fight Against Blood Cancer

Join us in supporting the Leukemia & Lymphoma Society's Student Visionaries of the Year Campaign and help bring an end to cancer

[San Diego, CA // February 2, 2023] — Abalta Technologies, Inc., a global leader in cutting-edge technology, announces its support for the Leukemia & Lymphoma Society's (LLS) annual Student Visionaries of the Year Campaign. The company was inspired to join the campaign after hearing the story of a customer's team member's daughter who had overcome acute lymphoblastic leukemia.

"At Abalta, we are honored to support the future leaders in the fight against cancer," said Ken Kuwajima, Chief Executive Officer. "Together, we can bring an end to cancer."

As a leader in the fight against blood cancer, LLS funds research in immunotherapy, genomics, and personalized medicine, providing education and support to patients and families, and mobilizing advocates to drive policy changes. Donations to LLS are greatly appreciated and tax-deductible.

"Thanks to our supporters, we are confident that this generation will be the last to see cancer," said Kuwajima.

For more information about the Leukemia & Lymphoma Society and to donate, please visit www.lls.org.
